Industrial PC G4400

GENERAL FEATURES

Industrial PC is perfect to be used as supervisory PC for CNC or PLC machines requiring CAD/CAM systems, 3D simulators or on-board optimizers.

The PC has a metal chassis, which also acts as a heat sink combined with an internal fan and can be fixed to the wall through special holes.

Computing power and high expandability make it a product suitable for multiple types of applications even on medium-complex machines.

The PC is compatible with Windows 10, Linux and can be supplied without an operating system or with a Windows 10 IoT LTSB operating system.

PERFORMANCES AND SPECIFICATIONS

Colour	Silver/Black
Size	200,4 x 154,5 x 57,6 mm
Material Case	Aluminium
CPU	Intel Pentium G4400
RAM	8 Gb
Video card	Intel HD510
SSD	128 Gb
Network ports	2 Lan (1 Gigabit Ethernet)
USB ports	4 USB 3.0 / 2.0 /1.1
COM ports	2 COM RS232/485
Video outputs	1 HDMI
Audio outputs	on HDMI
Wireless	Wi-Fi
Power	DC 12V/24V Input
Mounting	wall-mounted with fixing holes
Stock temperature	-30 C° ~ 80 C°
Working temperature	-20 C° ~ 60 C°
Humidity	5% ~ 95%
